

CONCOA Laboratory Systems: Everything Under One Roof

CONCOA's complete line of Laboratory Gas Control Equipment is the ideal solution to designing or outfitting your facility with the most reliable high purity gas control equipment. From continuous gas supply systems that handle any source to point of use pressure and flow control panels, CONCOA has it all under one roof, yours. By designing your laboratory, chemical process plant or Bio-pharmaceutical operations using CONCOA products, you are guaranteed improved analytical results and process control with long term cost savings. Managing and controlling your gas supply is at your fingertips or on your computer with our revolutionary products.

Choose your solution:

Continuous Supply:

Electronic Switchovers
538 Series Intelliswitch II Universal computer controlled switchover with a Web Server
539 Series Intelliswitch Universal computer controlled switchover.

Automatic Switchovers
526 or 527 Series Ultra High Purity Switchovers

Generator Backup:

540 Back Up Panel
542 High Flow Generator or Bulk Backup System

Remote Monitoring:

538 Series Intelliswitch II Web Server and Embedded Software
Advantium Plus Alarm Systems

Point of Use Control:

53 & 54 Series Point of use Panels
400 or 300 series Line Regulators

Flow Control:

560 & 565 Series Flow meters
566 Series Purge meters
567 Series High Flow Flow meters
